Problem

Research is unpredictable

- ▶ Can I find a good research question?
- ▶ My Stata/R/Python code keeps crashing, math, ...
- ▶ Cannot find the data, data is worse than expected, ...
- ▶ Stuck at solving the model (T), understanding the econometrics

Time is limited

Partial solution: Planning

- ▶ Make research more predictable
- ▶ Avoid surprises by anticipating challenges

Objectives

TSS planning

Leon Bremer

Objectives

Stages

Planning

Take-aways

Today's meeting objectives

- ① Convince you to make a planning
- ② Start the conversation
- ③ Get you excited about tackling a big project (thesis)

② Questions? Raise them.

Research stages

Ingredients and stages (like a recipe 🍴)

TSS planning

Leon Bremer

Objectives

Stages

Planning

Take-aways

3 ingredients

Idea

Method

Data

Thesis

6 stages

- 1 Orientation
- 2 Research question & problem statement
- 3 Literature review
- 4 Methods & data
- 5 Analysis
- 6 Reporting

💡 Risk analysis

- ▶ Do you have all ingredients?
- ▶ If one fails, what will you do?

Overlap

- ▶ Not a linear process, stages will overlap

Ingredients

TSS planning

Leon Bremer

Objectives

Stages

Planning

Take-aways

Idea, method, data

- ▶ Great starting point for a brainstorm
- ▶ Do you have an alternative for each? (Reduces risk)

Stages

TSS planning

Leon Bremer

Objectives

Stages

Planning

Take-aways

- ① Orientation
What interests you?
- ② Research question & problem statement
What would you like to know? Is that (societally) relevant? Is it new?
- ③ Literature review
What has been done? Where is the frontier? Where are the gaps?
- ④ Methods & data
How to answer your RQ? Identification, data accessibility, ...
- ⑤ Analysis
Data wrangling, descriptives, hypothesis tests, regressions
- ⑥ Reporting
Writing, producing tables & figures, layout

Planning your project

Making a planning

TSS planning

Leon Bremer

Objectives

Stages

Planning

Take-aways

The planning

- ▶ Put the stages on a time line (or on a calendar view)
- ▶ Allow for overlap
- ▶ Keep margin for error

Notes

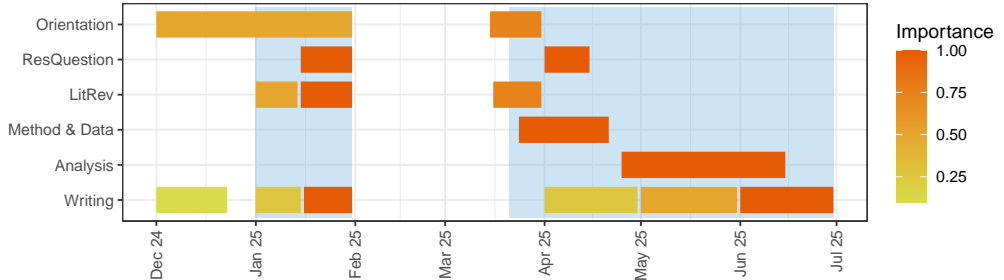

- ▶ No one-size-fits-all, but having some planning is beneficial to everyone.
- ▶ Supervisors differ too. Planning is your responsibility.

Tips

- ▶ Write a research proposal.

Example planning

💡 Tips

Many (online) planning tools. Use them, share them. [My creation](#)

Get organized

TSS planning

Leon Bremer

Objectives

Stages

Planning

Take-aways

- ▶ Keep things in a central place
- ▶ Good structure helps

Stages

Planning

Take-aways

💡 Tips

- ▶ Things will go wrong, anticipate this! (Risk analysis & margins)
- ▶ Different stages = opportunity!
 - ▶ Fed up with R crashing? Go write!
 - ▶ Read 10 papers already? Go check for data.
 - ▶ Been writing for two days? Go make descriptives.
- ▶ Write, write, write. Always.
 - ▶ Read a paper? Draft your take-aways into the literature section.
 - ▶ Have a good idea? Write it down.
- ▶ Do not get stuck at one stage for too long. Park it, move on.

Planning

Take-aways

Summary

- ▶ Ingredients: Idea, Method, Data
- ▶ Stages: Orientation, RQ, LitRev, Methods & data, Analysis, Reporting
- ▶ Not a linear process

💡 Tips

- ▶ Make a planning.
- ▶ Write. Always.
- ▶ Write a proposal and do a risk analysis.
- ▶ Keep going.
- ▶ Keep the overview. Zoom out sometimes.

Thanks
